The North Slope Borough Department of Wildlife Management endeavors to increase public awareness regarding subsistence-use wildlife through outreach and educational activities. Providing Tag-Team Presentations is a direct method for meeting this goal.

- Tag-Team Presentations on Wildlife Topic include three presenters:
  - Outreach Coordinator/Educator
  - Biologist/Scientist
  - Subsistence hunter/expert
- Presented to students in K-12 and beyond
- Tag-Team Presentations including all three elements provide the best outcome:
  - Educator keeps presentation on student level, translates the science, helps keep students engaged
  - Biologist/scientist provides scientific information and the "feeling" of his/her field experience
  - Subsistence hunter/expert provides the local traditional knowledge, the Iñupiaq language terminology, and the "feeling" of his/her hunting experience and being on the land/ocean
- The strategy of including all three elements in an educational presentation started out as a trial run which proved to be so successful that we try to include all elements whenever possible, whether at a classroom visit, radio talk show, or other venue.
