RINGED SEALS

A single adult male ringed seal was tagged on July 3, 2017 near Utqiagvik, AK. Map shows spatial movements and latest location.

Funding provided by the Collaborative Alaskan Arctic Studies Program (CAASP).

Note that a bearded seal* and a spotted seal* tagged in 2016 in collaboration with the Arctic Marine Mammals Program of the Alaska Department of Fish and Game (ADF&G) are both still transmitting.

A current map of their locations is available at:

www.adfg.alaska.gov/index.cfm?adfg=marinemammalprogram.icesealresearch

*funding from CAASP, Bureau of Ocean Energy Management (BOEM), and Office of Naval Research (ONR)

Map archives and more information are available on our webpage (www.north-slope.org/departments/wildlife-management/studies-and-research-projects/ice-seals/ringed-seal-research). Seal research is conducted under NMFS permit #15324 and Animal Care and Use Committee Protocol #2016-23.
