## Form 1100 – Statement of Contractual Terms for Infrastructure Sharing

**Directions:** The North Slope Borough (NSB) requires a NSB Land Use Permit Applicant to attach this Statement of Contractual Terms to its application if its application includes access to or use of infrastructure that the Applicant does not own. Infrastructure may include a structure, facility, pipeline, gravel pad, gravel road, ice road, dock, or other physical asset owned by another person/company that the Applicant plans to use.

The NSB requires the Land Use Permit Applicant to obtain approval using this form from the person/company that owns the infrastructure in order to demonstrate proof of legal access to share or use the other person's/company's infrastructure before the NSB processes a land use permit. If the term of the infrastructure sharing contract is limited to a particular timeframe, the NSB will limit the term of its approval to the same period. Therefore, it is important to clarify the term of the sharing contract. The NSB does not require that Applicant to provide a copy of the contract or disclose any contractual terms. The NSB only requires that the Applicant verify that it has a contract in place to use the infrastructure.
